JOB APPLIED FOR
POSITION
PREFERRED JOB
STUDIES APPLIED FOR

Junior Developer

PROFESSIONAL EXPERIENCE

In my free time I dealt with learning some programming languages(C, C++, Java, HTML, CSS and JS) and I did freelancing. I made various responsive websites for various clients using languages such as HTML, CSS and Javascript. However, I also made applications in console using the C++ and Java languages. Now I am starting to make projects using React, Node, etc to evolve and become a better developer.

Also, in high-school, I took the certificate of professional competence, acquiring the following competences: realization of the design and structure of the necessary for the implementation of software systems, software applications, database, web pages (customer-oriented software) and customization, configuration and modification of software applications in order to adapt the client's information systems.

In addition, I completed the "Database Design and Programming With SQL", course organized by Oracle Academy, where I learned about database programming.

EDUCATION AND TRAINING

2021-present	Transylvania University Brasov Computers Science Second year Brasov
